A. How to use Railisa

- Download UIC data <http://uic-stats.uic.org/>
- For registration – send an email to stat@uic.org to get a username and a password
- Report anomalies to stat@uic.org
- Note: some data can be provisional

- Reference

When using UIC data, please cite your source.

UIC (2019) International Railway Statistics, ISBN 978-2-7461-2861-3

- Steps to follow

1- Connect with your username and password

2- Select:

- a period, year from-to (e.g. from 2000 to 2017)
- a domain, (e.g. INFRA)
- one variable only (e.g. 1112 – Total length of lines)
- one region or more (e.g. Africa, Europe...All)
- one country or more (e.g. Morocco, Spain, Sweden... All)
- one company or more (e.g. ONCF, ADIF, RENFE, SJ... All)

3- Click on Save (in order to save the parameters of your selection)

4- Download the file, choose the level of visibility (1) of data (“UIC members” means the data is restricted to UIC members)

(1) In the Railisa database, each data has an assigned visibility level (see section B)

B. Visibility levels of data

- Level 1: Public

The data can be communicated to users who are not UIC Members (e.g. universities, consultants, public authorities).

- Level 2: Restricted to UIC members

The data is shared with UIC members only, i.e. the data is not public.

Only UIC members can see the level of visibility of data.
